

MUUG Meeting

The Manitoba UNIX User Group

Date: Tuesday, January 8th, 2019

Time: 7:30pm

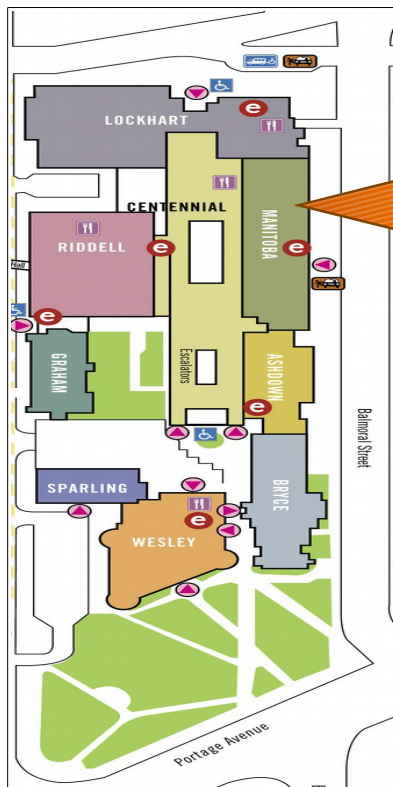

Topic: Test Driving oVirt with Nested KVM

oVirt is a KVM based virtualization solution by Red Hat which works on a data-centre / multi-server scale. Mark Jenkins will show that you don't need a rack full of servers or a SAN to try it out or simulate a production environment. The secret sauce for this is nested KVM.

RTFM: systemctl(1)

Most Linux distros have now adopted systemd as the new init process. Gilbert Detillieux will introduce the very basics of using **systemctl(1)** to control daemons in a systemd-based environment.

Location: 1M28 Manitoba Hall
(from January to March),
University of Winnipeg
(Entrance off Ellice Ave., between Spence St. & Balmoral St.)

Meetings are held in the University of Winnipeg's Manitoba Hall (marked "M" on the map). Entrance is on Ellice Avenue, between Spence and Balmoral St. We are now meeting in the east end of campus in room 1M28, 1st floor, Manitoba Hall. Look for a sign on the door. Doors are usually open by 7:00 pm with the meeting starting at 7:30 pm.

Parking is available on the surrounding streets. Please see <http://www.uwinnipeg.ca/maps> for further information about parking and access to the campus.
